MANAGE

VISION

To be counted among the most pioneering, innovative, user friendly and self-supporting agricultural management institutes in the world.

MISSION

Facilitating the Acquisition of Managerial and Technical skills by Extension Officers, Managers, Scientists and Administrators in all sectors of Agricultural economy to enable them to provide most effective support and services to Farmers and Fishermen for practicing Sustainable Agriculture.

Foreword

MANAGE has been striving to fulfil its Vision and Mission through developing capacities of agricultural extension functionaries besides policy support, research, education, consultancy and information services for the last 30 years. Capacity development is an essential process through which individuals, organizations and societies update knowledge, skills and capabilities to achieve their own development objectives over time.

MANAGE has been a pioneer in launching demand-driven educational and training programs which included the Post-Graduate Diploma in Management (Agri-Business Management), Distance Education Program for Extension Functionaries, Distance Education for Input Dealers and Certified Farm / Livestock Advisory Program. MANAGE has expanded its training horizon not only to all States in India but also to Asian and African countries through international training programs. Realizing the power of Information and Communication Technologies, MANAGE has started its distance educational programs through Massive Open Online Courses (MOOCs) platform in order to educate more number of extension functionaries in India and abroad.

MANAGE hones its training methodologies on continuous basis to enable the trainees to learn freely and confidently. We encourage participatory methods like group work, team building, role play, case study, group discussions, panel discussions, soft skills, field-visits, hands-on practice and videoconferencing with eminent people in agriculture, back-at-work plans etc., to maximize the learning process in training programs and workshops.

We, at MANAGE, believe that imparting training to right person is very important to get desired results. I am sure that the Training Calendar 2018-19 would help State Government Departments, Indian Council of Agricultural Research Institutions, State Agricultural Universities, Krishi Vigyan Kendras, State Agricultural Extension & Training Institutions, Farmers' Organizations, NGOs and Private Sector Agencies to identify right program to nominate right persons in order to improve their capacities to deliver extension services to farmers effectively.

About MANAGE

The National Institute of Agricultural Extension Management (MANAGE) was established in 1987 as an autonomous organization under the Department of Agriculture, Cooperation and Farmers' Welfare, Ministry of Agriculture & Farmers' Welfare, Government of India, in response to the challenges of agricultural extension in a rapidly growing and diverse agriculture sector. Increasing focus on commercialization and market orientation in agriculture, as well as the growing complexity of agricultural technologies, demanded major initiatives towards reorienting and modernizing the agricultural extension system in the country. MANAGE has a mandate to assist the Centre, States, Public and Private Sector Organizations for effective management of their agricultural extension systems.

The core activities of MANAGE are carried out through the following theme-based Centres and a School of Agribusiness Management:

MANAGE Centers

- Centre for Agricultural Extension Policy, Public Private Partnership in Extension and International Centre of Excellence in Agricultural Extension
- Centre for Agricultural Extension Innovations, Reforms & Agripreneurship
- Centre for Capacity Building of Agri-institutions
- Centre for Supply Chain Management & Marketing in Agricultural Extension
- Centre for Extension in Agri-Allied Sectors
- Centre for Knowledge Management, ICT and Mass Media in Agricultural Extension
- Centre for Gender in Agriculture, Nutritional Security and Urban Agriculture
- Centre for Sustainable Agriculture, Monitoring and Evaluation of Programs and Plans
- School of Agribusiness Management

Services

MANAGE offers its services in Training, Research, Consultancy, Management Education, apart from implementing select Central Sector Schemes. MANAGE programs and activities cover all its stakeholders' viz., public and private sector organizations, voluntary organizations, farmers' groups and organizations, private extension service providers, agribusiness companies and cooperatives and other national and international organizations.

Training is an integral part of the Institute's mandate. MANAGE imparts need-based training on select thematic areas to extension functionaries working in state Departments of Agriculture, Horticulture, Animal Husbandry & Veterinary Science, Fisheries, Sericulture, Scientists of State Universities as well as Executives in the private sector.

Training Programs, Workshop and Seminars are organized on key theme areas of current importance to prepare the extension functionaries to cope with new challenges and for effective implementation of various Flagship programs of Governments. MANAGE also organizes customized programs in response to the requests from the GoI/States/UTs and private sector. Executives from Private sectors are encouraged to participate in MANAGE training programs on payment basis.

IV. Certified Farm / Livestock Advisor Program

MANAGE organizes need based Extension Management programs for the Extension functionaries of Agriculture and Allied departments in the country. However, it is being felt that the capacity building programs of MANAGE should help the extension functionaries to take forward the proven technologies from National Agriculture Research System (NARS). Hence MANAGE proposes a new initiative titled “Certified Farm/Livestock Advisor” program with the help of ICAR institutes/SAUs and other Elite Institutes for extension officers in agriculture and allied sectors through a systematic approach covering three modules.

Module – I: will deal with sectoral specific latest technologies and management aspects for a period of three months through e - platform by MANAGE on important and emerging areas. The Study material will be in the form of Text, Powerpoint and videos. As Module -I is administered through online, the officials enrolling for the program will not disturb from their regular duties. Functional/working knowledge of computer is required for enrollment.

Module – II: Those who have completed Module –I will be sent to the identified ICAR institutes/SAUs/Elite Institutes (based on the need and specialization preferred by the extension functionaries) for intensive specialized skill oriented training for a period of 15 days, within or outside their respective states. To start with, MANAGE proposes to conduct Module-II in 21 crops/enterprises.

Module – III: On completion of Module – II, the candidates will try to apply his learning in the field at his place of work for a period of Eight Months. The candidate will be provided handholding support by a Mentor Scientist from the same Institute where he has undergone Module-II. The handholding will be in the form of technical guidance to the candidate whenever he faces any problem in the field, while applying his technical knowledge/skills acquired on the specialization of crop/enterprise. This will help the candidate to develop holistic understanding on the practical aspects of specialization. By the end of Module-III, the candidate will be competent enough to solve the field problems and will be able to provide better advisory services to the farmers.

After completing all the three Modules, the competency of the candidate will be assessed on his specialization, and will be recognized as “**Certified Farm/Livestock Advisor**” jointly by the concerned ICAR/other relevant institute and MANAGE.

Expected outcome:

Candidate completing this program will acquire good knowledge on a particular crop/ Specialization. After recognizing the candidate as “Certified Farm/Livestock Advisor”, MANAGE will display their names in its website so that the stakeholders could verify the credentials of the Advisors and make use of their services. This program also helps to create a Cadre of experts on various subjects/specializations within the department by suitably enhancing their core competencies to enable them deliver effective Technical advisory services, thereby addresses the field problems, faced by the farmers.

Eligibility Criteria for enrollment:

Extension Functionaries/Agripreneurs graduated in Agriculture, Horticulture, Veterinary Sciences, Dairy Sciences and other Agriculture related courses, up to an age of 55 years with functional literacy in computer operations are eligible for enrollment.

Fee:

The course fee for the extension functionaries working in Govt. Department is Rs.5000/- and for private candidates and agripreneur is Rs.15,000/- per candidate.
